Not Just Cosmetics

When Systems 5/2 are equipped with labellers with a 250 mm dispensing width, they are exploitable in a variety of applications in the chemical sector, to label cans and bottles from medium to large size.

The above machine has been supplied to a producer of lubricants and consists of a system 5/2 equipped with 2 labellers model Original 2.5 and customized so as to accommodate larger and heavier products: the chain orbiter is used to orient products, a split conveyor running at 2 different speeds caters for product spacing, a larger and enhanced DSP stabilizes products, the end application rollers are motorized to put a higher pressure when applying “difficult” labels, e.g. PVC labels, on irregular surfaces and avoid bubbles.

*The chain orbiter
orients products; the spit
conveyor spaces them*

*Motorized rollers put higher pressure
on labels onto products*

>> *What?*

- Customized SYSTEM 5/2
- Products: cans and bottles
- Output: 50 pieces/minute
- Sector: Chemical
- Area: Germany/Bema

>> *Where?*

- Application on cans and large bottles

>> *Why*

- Very common application
