Thermal Transfer Ribbons

Wax Ribbon - SolFree®

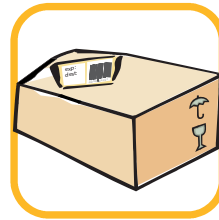

With the SolFree® innovation, for the 1st time the thermal transfer ribbon is 100% produced without using solvents, contrary to what has been done till today. SolFree® process reduces the carbon footprint of CO2 and in addition increases the print head life, with zero impact on print performances and printer settings. This SolFree® produced ribbon enables the industry to meet the requirements of the increasing number of end-users, committed to sustainable development, satisfying their environmental preservation concerns.

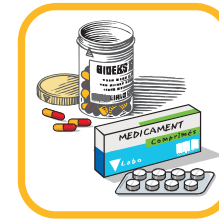

This polyvalent, densely black highly sensitive ribbon allows printing on all kinds of papers. The Etipack Standard Wax is a general purpose ribbon, used for a variety of applications, e.g. shipping, inventory, pharmaceuticals, retail labelling, direct food contact, conveyor sorting, labelling of frozen food.
